new ep released May 2006

# Hi God People

## *Shortwave Children*

Four years after releasing their last album *Play to the temple of depth*, Melbourne's Hi God People have returned to the studio to realize a number of recordings.

First cab off the rank is the four-song ep *Shortwave Children*, which happens to be the final instalment in the *Terra Australis Incognita* series of Australian sound art EPs released by the Shame File label.

*Shortwave Children* was recorded at the 3CR studio, then edited and layered to produce four pieces of sonic beauty. The HGP wrote a list of phrases and chose four of them to be the song titles - these are highlighted in red on the back cover. The entire list was used as lyrics for a live show.

*Shortwave Children* is available in cd format at Synaesthesia Records or by mp3 download from Shame File.
